An increasing number of Region 1 administrations permit the use of 7100- 7200 KHz on secondary basis in the extended 40m band. ÖVSV therefore recommends a provisional Region 1 band plan as follows:

Frequency	Bandwith	Mode
7000-7035	200Hz	Telegraphy (CW)
7035-7040	500Hz	narrow band modes
7040-7045	2700Hz	all modes
7045-7150	2700Hz	phone, telegraphy (CW)
7150-7200	2700Hz	phone, telegraphy (CW), SSTV, FAX

Footnotes:

7171	2700Hz	SSTV (same as in region 2)
7100-7200	2700Hz	no unattended transmissions (e.g. mailbox)
7100-7200	2700Hz	no contest operation
