Introduction

The Permanent HF Contest Committee (subcommittee within C4 -- the Permanent HF Committee) is proposed to be discontinued, due to small amounts of business to be handled by that committee.

Background

The permanent HF Committee was established within C4 when the contest agenda was so extensive that there was not enough time to discuss all matters properly during the conferences. During the last conferences contest-related business has been minor.

We have also experienced that decisions made by the HF Contest Committee, after thorough discussions, have been overruled in the plenary by national societies that did not take part in the preceding discussions.

There have been little or no contest-related business between conferences. The contest related business can now be handled by the permanent HF Committee directly.

Key points and proposal

Therefore it is time to discontinue the HF Contest Committee.

Recommendations

It is recommended that the C4 decides to discontinue its HF Contest Committee.
