

International Amateur Radio Union Region 1 2011 Regional Conference – Sun City, South Africa 12 to 19 August 2011

Subject	Existing 500 kHz recommendations		
Society	RSGB	Country:	Great Britain
Committee:	C4	Paper number:	SC11_C4_25
Author:	Ian Greenshields, G4FSU		

Introduction

A number of recommendations relate to the acquiring of a secondary allocation near to 500 kHz are out-of-date.

Background

The 500 kHz Working Group was of most value during the early stages of the WRC-12 preparation for AI1.23, but activity and usage has become moribund as a number of the people involved have been subsumed onto the IARU-WRC12 group or involved on a personal basis. Region 1 should thank the Working Group for its efforts and recommend that it is closed.

Recommendation

- San Marino 2002 - REC/02/SM/C4.11 can be suppressed as the matter is in hand via the ITU and CEPT preparation processes;
- Davos 2005 – DV05_C4_Rec_01 and Cavtat 2008 – CT08_C4_Rec_01 could also be suppressed along with the closure of the 500 kHz Working Group.
