

# International Amateur Radio Union Region 1 2011 Regional Conference – Sun City, South Africa 12 to 19 August 2011

Subject	144 MHz band plan: allowance for cross band activity		
Society	UBA	Country:	Belgium
Committee:	C5	Paper number:	SC11_C5_18
Author:	Jacques Verleijen, ON4AVJ		

## Background

There is a demand for frequencies in the 2 m band for cross-band unmanned stations and so there is a need for adapting the 2 m band plan and the footnotes.

## Motivation

There is a demand to be able to use the cross band-function available on many modern transceivers to construct less expensive and more simple repeaters. We should allow this but preferably only with the inputs on 2 m and the outputs on other bands (one-way).

## Current situation

See the VHF-handbook V5\_40, page 39 and following.

## Proposal

Make a change to the 2 m band plan in the general footnote: (proposed changes are in red)

### 1. IARU REGION 1 BAND PLAN

The following notes are part of the officially adopted IARU Region 1 band plan, and all member societies should strongly promote adherence to the recommendations made in these notes.

#### 1.1. General

....

- ii. **Except in the part of the band allocated to the Amateur Satellite Service and the linear transponders it is not allowed to use **output** frequencies in the 145 MHz band for repeaters with **input** in other amateur bands**

....

## Remarks
