

International Amateur Radio Union Region 1 2011 Regional Conference – Sun City, South Africa 12 to 19 August 2011

Subject	Ratification of paper VIE10_C3_B01 Threatening Developments at 2 300 – 2 400 MHz		
Society		Country:	
Committee:	C5	Paper Number:	SC11_C5_13
Author:	Michael Kastelic, OE1MCU		

Threatening Developments at 2 300 – 2 400 MHz

Recommendations

It is likely that continuing pressure from commercial interests may lead to further erosion of our position in the band. We also have the disadvantage of Secondary status. Therefore -

- It is clear that both Societies and IARU need to monitor developments in this band lest this valuable allocation becomes even more problematic than at present. Societies should provide timely updates to IARU VHF and External Relations Committees
- Where opportune and faced with losses in 2 300 – 2 400 MHz, to request that substitute spectrum at 3 400 – 3 410 be made available in line with European Allocation footnote EU17. This was a tactic used in the Comreg consultation and has the advantage that the EU footnotes can give us increased priority
- IARU to consider how ECA Table footnotes can be added/modified to protect this band (particularly around 2 320 MHz)

Abstain – VERON

In favour, the remainder.
